

In this newsletter, we are going over a number of updates regarding reporting in the backoffice and in windows.

---

## Epson Printer/Tablet Stand Available

We've had a number of customers inquire about options for tablet stands, or better ways to secure an ipad or windows tablet while working. We're happy to offer a new option for this, built in to a printer that we are now offering at an introductory price of \$499.99.

Tablet not included.

Tablet not included.

This device is the Epson OmniLink TM-m30II-SL, which offers ethernet, USB, or Bluetooth connectivity, can connect other devices to your tablet through USB, and can even charge your tablet through a connected USB cable. As you can see in the above pictures, it also can be set up standing or laying flat, and offers maximum flexibility to suit the space available for your store.

For further information about this product, please contact sales.

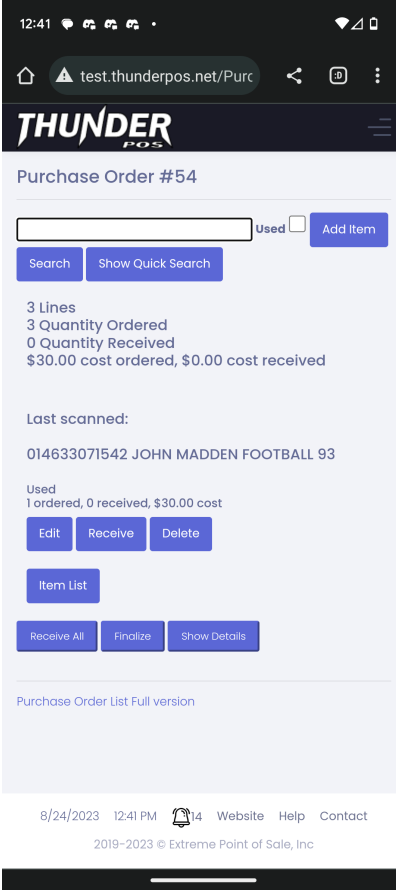

## ThunderPOS.net Updates

There are a number of updates to the backoffice ThunderPOS.Net website that will give you greater options and improve the user experience. These are available immediately to all cloud users.

Several of the more popular reports already offered Excel and PDF exports to allow you to view, print and utilize the data. With this release, we have added these export options across all ThunderPOS.net reports. To download them, first run the report, then using the excel or PDF buttons that will appear near the top left of the report, as shown below.

| Item ID      | Name   | Category ID | Department ID | Quantity Sold | New Quantity | Used Quantity |
|--------------|--|-------------|---------------|---------------|--------------|---------------|

We have also rolled out our mobile-mode screens with this version. For several screens where the full version was not practical for phone usage, you will now have options to view the screen in mobile-friendly layout. These screens will show you the most important information within a phone screen size and allow you to dig in to see details. This release has mobile versions of purchase orders, vendor returns, and for our Enterprise users both individual store transfers and multi-store transfers. On screens where this is available, you will see a link to the mobile version along the bottom of the page; once in the mobile version, a link to the full version will be available in the same way.

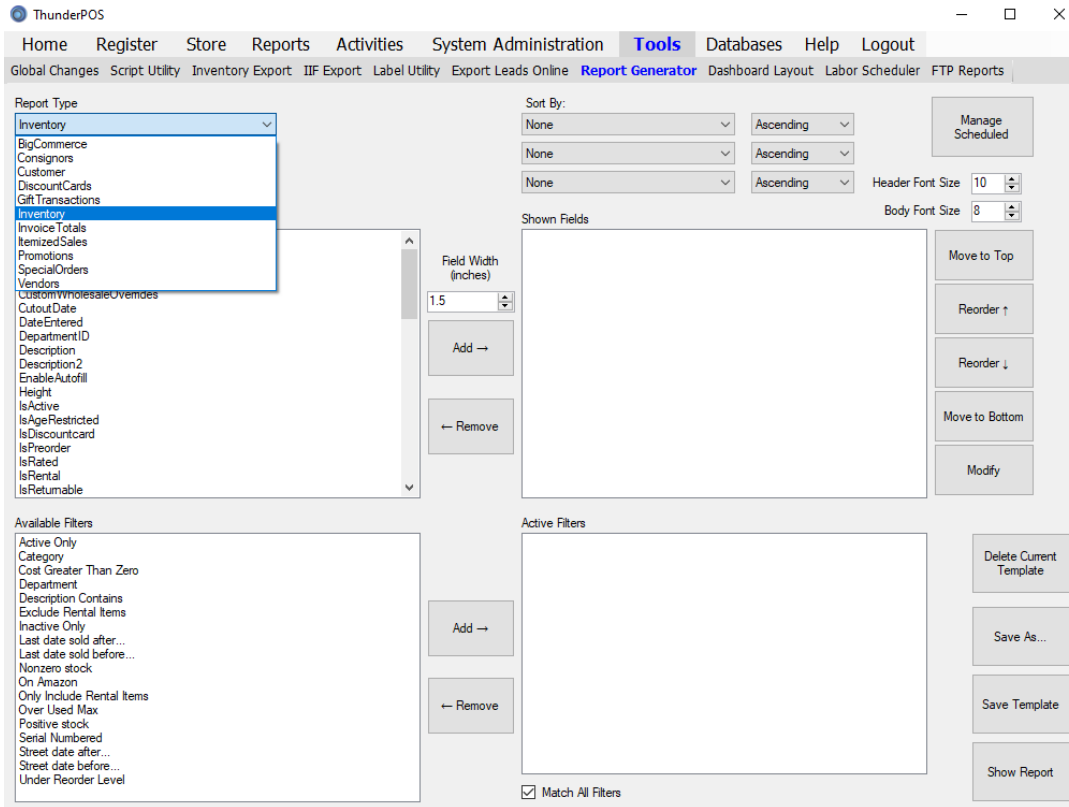

The purchase order screen is shown above. You can continue to utilize the full version of these screens from any device if you prefer.

---

## ThunderPOS for Windows Updates

The windows version will also be receiving a number of updates in the coming week. Version 23.9.1 will include tweaks to several reports for clarity. Also, customer statements now can have the customer's address positioned for mailing.

There is also a new customizable report available in the report generator in ThunderPOS, one that will allow you to build a custom report on your consignors. The report generator, which already features several other buildable reports that allow you to powerfully arrange your fields and filters on things such as items and customers, can be found through the tools menu and then Report Generator.

Just like with normal reports, if you have an email server set up, you can schedule the reports you build through this to automatically be sent through email to you as an excel file or a pdf.

We will be closed on Monday, September 4th for Labor Day.

The current version of the software, available for supported users, is 23.7.2. To get back on support, or to upgrade to phone support from email support, contact sales at (919) 387-7597 x100. If you are not on phone support, and you call, a response will be sent to the email address on file. You can also buy a support incident from our website.

If you are on a version older than 5.0 that has been sunset, you can contact sales for information on purchasing an update. All versions prior to ThunderPOS 5.0 have been sunset from support as of December 31st, 2022.
