Upcoming iPad Features

There are a number of updates in development for the iPad register application, looking to bring it closer to parity with the Windows application without the need to utilize ThunderPOS.net.

First, we're adding the ability to edit items and manage departments, categories, and vendors.

The screenshot shows the ThunderPOS iPad application interface. At the top, the status bar displays '2:28 PM Thu May 14' and '100%' battery. The main screen is divided into two sections: 'Vendors' on the left and 'Editing Vendor' on the right.

Vendors List:

- 0 (None)
- 000000505215 (Changed Name)
- 111222 (Bob)
- 1235 (4)
- 132654 (j)
- 2 (2)
- 211 (Company)** (Selected)
- 222 (fdsafdsa)
- 2333 (23)
- 23432 (i)
- 3 (Extreme Point of Sale)
- 321 (i)
- 333 (Test)

Editing Vendor Form:

Vendor ID	211	Email	
Company	Company	Email 2	
First Name	First	Email 3	
Last Name	Last	Web Site	
Address 1		Web User Name	
Address 2		Web Password	
City		Commission	0
State		Rent	0
Zip		User	
Phone		Use Default Discount	<input type="checkbox"/>
Phone 2		Default Discount	0
Phone 3		Terms	
Fax		Vendor Tax ID	

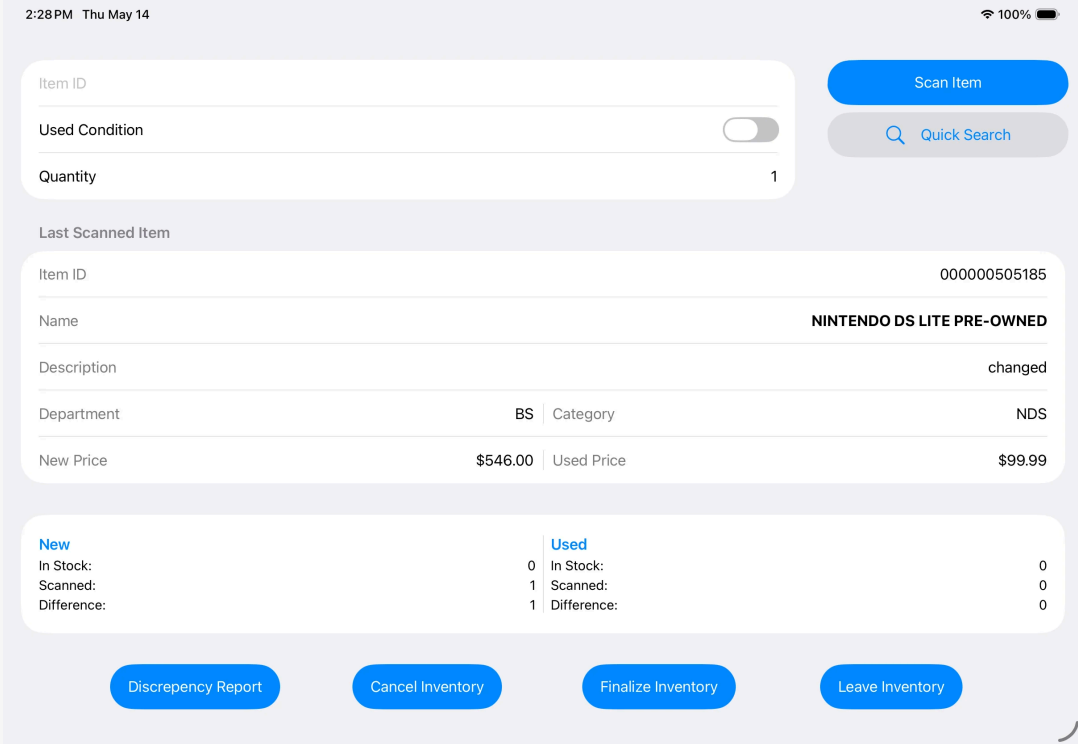

At the bottom of the 'Vendors' list are buttons for 'Add', 'Edit', 'Merge', and 'Exit'. At the bottom right of the 'Editing Vendor' form are buttons for 'Save' and 'Cancel'.

These functions should allow you to get started on inventory just from within the iPad if you need to, without having to necessarily access

thunderpos.net for relatively minor operations.

We're also updating the search functionality for items and customers to bring it much closer to windows, including allowing searching by contains, equals, and not contains for various fields.

Additionally, we're adding native support within the iPad for performing physical inventory directly within the application.

Physical inventory may be started, continued, or completed from an iPad, just like from windows or from thunderpos.net. Above, we've included a prototype screenshot of the inventory count screen.

Look forward to these and other features forthcoming soon!

Hardware Orders

If you are in need of point of sale hardware, such as receipt printers, label printers, or scanners, or may need replacement equipment soon, we would advise ordering that sooner rather than later. Current events

have raised prices already, and they are likely to continue to rise further.

In addition to being able to order individual printers and order devices through [our shop](#) we also offer a number of different [bundles](#), whether you're shopping for hardware for use with Windows or with an iPad register.

Please allow some lead time, and if you need a quote on a larger hardware order feel free to reach out to our sales team rather than ordering through the website.

We will be closed Monday, May 25th for Memorial Day.

If you're interested in subscribing to the software, you can do so by contacting sales at (919) 387-7597 extension 100 or by subscribing through our [licensing website](#).

Active monthly subscriptions include support and software updates. Support may be reached at (919) 387-7597 extension 101, or via email at support@thunderpos.com.
